

# 10 REASONS WHY METRO'S SUPERSOFT® Sponge Weatherstrip is the BEST!

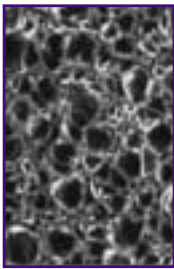

Simply the Best Weatherstripping Available

1. **SUPERSOFT®** has a very smooth skin that is free of exposed cells or flaws.
2. **SUPERSOFT®** is composed of micro-closed cells that are uniform in size, providing even compression and sealing so you won't have to slam your doors.
3. **SUPERSOFT®** is jet black, not ash gray, for a refined, concours look.

4. **SUPERSOFT®** is molded using computerized temperature control for consistent cure cycles. This prevents scorching or under-cured parts.
5. **SUPERSOFT®** is made with over 50 tons of pressure for perfect definition and exact detailing.
6. **SUPERSOFT®** weatherstrips are hot bonded at the joints.
7. **SUPERSOFT®** dies are made using CAD and CNC mills for proper 3-D contouring, assuring a perfect fit and OEM quality appearance.
8. **SUPERSOFT®** sponge is made in the U.S.A.

50x

METRO's **SUPERSOFT®** sponge rubber has a micro closed cell structure with a self-molded skin that is free of flaws.

50x

Others are too hard with various sized cells exposed, creating inferior looks. The skin is often a separate piece.

See the Difference

9. **SUPERSOFT®** is guaranteed for a full 15 years. Each part comes with a certificate of guarantee.
10. **SUPERSOFT®** sponge weatherstripping is simply the softest reproduction on the market!
